“ I worked with a lot of great people at FM for 37 years. None was more thoughtful or helpful than Jim. He was a great person, and a really great engineer, helped hundreds of FM engineers through the years with his various computer programs. All that I can say right now is that I am truly sad... “ We all know Jim was proud of his sons, was a technical wizard and always had an answer for those of us who worked with him. Even better was his attitude and respect of others; he never had a disparaging or combative reply. He was supportive as chief engineer and espoused us to achieve- that will make him so memorable to me. I am very disheartened to see him go this early this way. Walter Barth
