“*Mr. Latzko was a wonderful man, a great engineer, and was an inspiration to me when he hired me on as a draftsman (my first real job) at P&W back in 1980. He was a great leader (Vice President of Engineering) and had a wonderful sense of humor. He had a real compassion for others, and had a gift for seeing the best in people. I'll always be grateful to him for giving me a chance as a kid right out of school - a tough time in the economy, and especially in the machine tool industry. I learned so much from that man; he's one of the people that I owe so many good things (for both me and my family) in my life to. I will never forget him.*
